

# Frommelt® Dock Seals

Frommelt loading dock seals provide a tight compression seal around the trailer top and sides for the highest sealing efficiency. As with all foam dock seals, access to loads on the trailer can be restricted by foam protrusion into the trailer opening. Seal models vary based on their construction, durability and performance features. All seals are available with head pads or head curtains. Insulator II and Platinum Series seals feature High Performance headers, while TP II and FDS Series units feature the Classic header designs.

## INSULATOR™ II Series Dock Seals

- Most durable dock seal for longest life in high-traffic applications and those where dock seals are easily damaged
- High Performance head pad/curtain design
- No wear pleats required. High-strength, friction-resistant Durathon™ fabric layer covers flexible 22 oz. vinyl base layer on full height of unit
- Durathon reinforcing also covers inner sidepads to protect against damage from forklifts and loads
- Removable corner wear boots and head curtain are attached with Velcro for quick, low-cost maintenance
- Firefighter™ heat-dissipation protection standard in headers; optional in side pads
- 36-month money-back satisfaction guarantee
- **No competitive equal**

## TP PLATINUM™ Series Dock Seals

- High-durability seal for applications that tend to damage dock seals
- High Performance head pad/curtain design
- Optional ArmorPleats™ available in Durathon high-strength, friction-resistant fabric for maximum wear-resistance in a pleated unit
- Removable corner wear boots and head curtain are attached with Velcro for quick, low-cost maintenance and easy upgrades
- Firefighter heat dissipation protection standard in headers
- 36-month money-back satisfaction guarantee on header; 12-month guarantee on full unit
- **No competitive equal**

## TP II Series Dock Seals

- Standard durability dock seal for lower-traffic applications
- Classic head pad/C-curtain design
- Optional Firefighter™ heat dissipation protection in headers
- Optional ArmorPleats™ available in Durathon™ high-strength, friction-resistant fabric for maximum wear-resistance in a pleated unit
- 12-month money-back satisfaction guarantee; 36-months on Firefighter header
- Similar design to competitive units (except Firefighter and Durathon features which are exclusive to Frommelt)

## FDS Series Dock Seals

- Standard durability dock seal for lower-traffic applications
- Optional Firefighter™ heat dissipation protection in headers
- Optional ArmorPleats™ available in Durathon™ high-strength, friction-resistant fabric for maximum wear-resistance in a pleated unit
- Similar design to competitive units (except Firefighter and Durathon features which are exclusive to Frommelt)
- 12-month money-back satisfaction guarantee
